Preface

Families and Households contains final statistics from the Census of Population and Dwellings held on 6 March 2001. It is one of a series of reports that provide detailed statistics on the characteristics of New Zealand's population, households and dwellings.

The information in this report covers a range of data on the types of families and households in which New Zealanders live. It shows changes in family and household types over the last three censuses and provides information on the demographic, social and economic characteristics of different types of families and households and of the people who live in them.

Statistics New Zealand makes census data available to a wide range of people. The data is important to planners and policy-makers, researchers, community groups and the general public. A range of information from the 2001 Census has been published and is available free on the Statistics New Zealand website. In addition to published statistical information, Statistics New Zealand can provide customised information to meet the specific needs of users on a cost recovery basis.

Statistics New Zealand acknowledges the contribution of New Zealanders in their overwhelming support of the 2001 Census, and of the large number of people involved in planning, collecting, processing and disseminating the information.

A handwritten signature in black ink, appearing to read 'B. Pink', with a stylized flourish at the end.

Brian Pink
Government Statistician

Information Centre

Your gateway to Statistics New Zealand

Each year, we collect over 60 million pieces of information. New Zealanders tell us how and where they live; about their work, spending and recreation. We also collect a complete picture of business in New Zealand. This valuable resource is yours to use. But with all the sophisticated options available, finding exactly what you need can sometimes be a problem.

Giving you the answers

Our customer services staff provide the answer. They are the people who know what information is available, and how it can be used to your best advantage. Think of them as your guides to Statistics New Zealand. They operate a free enquiry service where answers can be quickly provided from published material. More extensive answers and customised solutions will incur costs, but we always give you a free no-obligation quote before going ahead.

Liability statement

Statistics New Zealand gives no warranty that the information or data supplied contains no errors. However, all care and diligence has been used in processing, analysing and extracting the information. Statistics New Zealand shall not be liable for any loss or damage suffered by the customer consequent upon the use directly, or indirectly, of the information supplied in this product.

Reproduction of material

Any table or other material published in this report may be reproduced and published without further licence, provided that it does not purport to be published under government authority and that acknowledgement is made of this source.

Standards

Symbols

The interpretation of the symbols used throughout this report is as follows:

- nil or zero
- amount too small to be expressed
- .. figures not available
- ... not applicable
- nfd not further defined
- nec not elsewhere classified
- C confidential

Confidentiality

The Statistics Act 1975 sets out strict requirements on Statistics New Zealand to protect the confidentiality of information obtained from respondents during the Census of Population and Dwellings and other surveys. Action is taken at every stage of the census to make sure that only authorised people work with individual returns, and then with only as much as they need to know for that stage of the process. All staff who work on the census and other surveys have signed a Declaration of Secrecy.

It is an offence for any staff member to break the statutory declarations of secrecy that they make, and there is a very long history and tradition of consistent performance with keeping confidences over many censuses. Such a record supports the high level of public trust in Statistics New Zealand, and has led to the high levels of response to the census by New Zealanders.

During the collection of documents, there were arrangements for forms to be collected in sealed envelopes, should that option be chosen by a household or person. The names and addresses of respondents were used to ensure that all forms were collected from a household and are not part of the final computerised information.

When the census paper forms have been processed, Statistics New Zealand continues to have clear, statutory obligations to maintain the confidentiality of the census data in its custody. The Statistics Act includes a section that overrides the legal investigative

powers of other government agencies to obtain information. In publishing statistical tables and other aggregated statistics from the census datasets, Statistics New Zealand employs measures such as random rounding to protect the confidentiality of individual information.

Random rounding

Since the 1981 Census, Statistics New Zealand has utilised a confidentiality assurance technique of randomly rounding census statistics to base three. This enables the greatest possible amount of census data to be released without compromising the privacy of individual responses.

Under the random rounding process, all table cell values, including row and column totals, are rounded as follows

1. Zero counts and counts which are already multiples of three are left unchanged.
2. Other counts are rounded to one or other of the two nearest multiples of three.

All rounding, including separate rounding of totals and sub-totals is carried out on the recorded results. The probabilities of rounding up or down are set so that the long run expected value equals the original count. For example, an original count of 17 would be rounded to 15 with a probability of 1/3 and rounded to 18 with a probability of 2/3, since $15 \times 1/3 + 18 \times 2/3 = 17$. The effect of this rounding on the accuracy of census statistics for practically any proposed use is insignificant.

Rounding procedures

On occasions, figures or percentages have been rounded off to the nearest unit or decimal point. This may result in a total disagreeing with the total of the individual items as shown in tables.

Calculation of ratios

Unless otherwise stated, the 'not stated' category has been excluded from the denominator in calculation of ratios and percentages.

31. Selected summary characteristics, for extended families in private occupied dwellings, 1996 and 2001	108
32. Sources of extended family income (total responses) by extended family type, for extended families in private occupied dwellings, 2001	109
33. Selected summary characteristics for families in temporary private occupied dwellings, 1991, 1996 and 2001	110
34. Regional council by family type, for families in temporary private occupied dwellings, 2001	112

List of Tables *(continued)*

35. Selected summary characteristics, for households in private occupied dwellings, 1991, 1996 and 2001	113
36. Household composition by regional council, for households in private occupied dwellings, 2001	116
37. Household composition and number of usual residents in household by number of bedrooms, for households in private occupied dwellings, 2001	118
38. Household composition by number of dependent children in household, for households in private occupied dwellings, 2001	128
39. Household composition by sources of household income (total responses), for households in private occupied dwellings, 2001	129
40. Household composition by total household income, for households in private occupied dwellings, 2001	132
41. Household composition by tenure of household, for households in private occupied dwellings, 2001	134
42. Household composition by access to telecommunication systems (total responses), for households in private occupied dwellings, 2001	136
43. Household composition by number of motor vehicles, for households in private occupied dwellings, 2001	137

Highlights

Introduction

In the census, information is collected on the relationships between people living in private dwellings. This information is used to derive data on families and households.

The census definition of a family is two or more people living in the same household who comprise either a couple, with or without children, or one parent and their children. A child in a family can be of any age, but must not have a partner or children of their own living in the same household. This definition of family excludes parents and children who live in different households. It should be noted, therefore, that the family data presented in this report relates to families within households.

The census definition of a household is either one person who usually lives alone, or two or more people who usually live together and share facilities, such as eating or cooking facilities. A household may contain more than one family, or other people in addition to a family.

Families

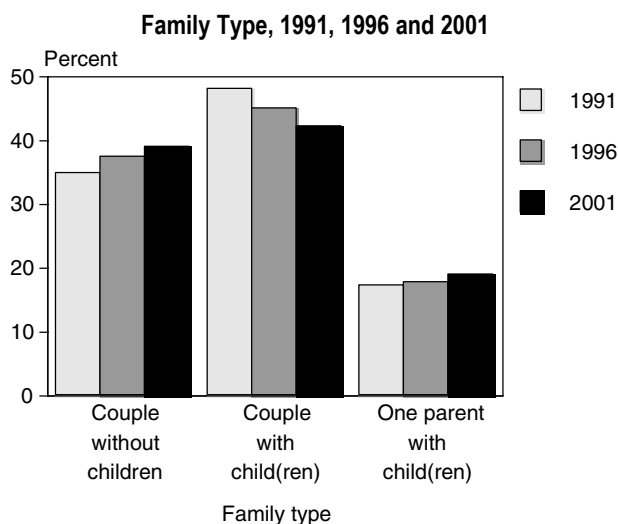

The number of families in New Zealand has increased by 1.9 percent since the 1996 Census. In 2001, there were 967,614 families usually resident in private occupied dwellings, up from 949,410 in 1996. The term 'private occupied dwellings' includes private permanent dwellings and private temporary dwellings. Almost all families (99.8 percent) were in private permanent dwellings.

The most common type of family is a couple with children. Since 1991, however, the proportion of families consisting of a couple with children has been decreasing, while the proportion consisting of a couple without children has been increasing, as shown in Figure 1. The proportions of families made up of couples with children and couples without children are now quite similar at 42.1 percent and 39.0 percent respectively, compared with 48.0 percent and 34.8 percent respectively, at the time of the 1991 Census. The proportion of families consisting of one parent with children has shown a small increase since 1991. In 2001, 18.9 percent of families were one-parent families, up from 17.2 percent in 1991.

In the North Island – as for New Zealand overall – couples with children were the most common family type, making up 42.7 percent of North Island families. In the South Island, however, couples without children were the most common family type, making up 43.1 percent of South Island families. One-parent families made up a higher proportion of North Island families (19.7 percent) than South Island families (16.4 percent) and were much more common in some regions than others. The Gisborne Region had the highest percentage of one-parent families, at 27.6 percent, whereas the Marlborough Region had the lowest percentage, at just 13.4 percent.

Most families with children contained at least one dependent child (81.1 percent). Of families with dependent children, 70.8 percent were two-parent families and 29.2 percent were one-parent families.

Figure 1

Tenure, Access to Telecommunication Systems and Access to Motor Vehicles

Data on tenure, access to telecommunications and access to motor vehicles is collected at the household level, not the family level. This means that the data may not necessarily reflect the circumstances of a particular family in a household that comprises more than one family, or contains other people in addition to a family.

The majority of families lived in a dwelling that was owned, with or without a mortgage. However, this percentage has been decreasing over the past three censuses, and the percentage living in rented dwellings has been increasing. In 2001, 71.4 percent of families lived in dwellings that were owned, down from 78.6 percent in 1991, and 28.6 percent of families lived in rented dwellings, up from 21.4 percent in 1991.

Nearly all families had access to a telephone, at 97.1 percent, while levels of access to a fax and the Internet were 30.1 percent and 44.1 percent, respectively.

Since 1991, the percentage of families in households with access to one motor vehicle has decreased, with just over a third (34.0 percent) having access to one motor vehicle in 2001, compared with 43.5 percent in 1991. Over the same period, the percentage in households with access to two or more motor vehicles has increased, rising from 37.7 percent to 44.4 percent for those with access to two motor vehicles, and from 12.2 percent to 16.8 percent for those with access to three or more motor vehicles. In 2001, 4.9 percent of families lived in households that did not have access to a motor vehicle, down from 6.7 percent in both 1991 and 1996.

Families in Temporary Private Dwellings

At the time of the 2001 Census, there were 1,620 families usually resident in temporary private dwellings (that is, caravans, cabins, tents and other makeshift dwellings and shelters). The Auckland, Northland and Bay of Plenty Regions together contained about half of these families, with 20.4 percent in Auckland, 16.9 percent in Northland, and 14.4 percent in the Bay of Plenty.

The most common family type in temporary private dwellings was couples without children (55.2 percent). Couples with children made up 26.9 percent of these families and one parent with children families made up the remaining 18.1 percent. Although most of these families had access to a telephone, the percentage was lower than for all families, at 83.2 percent. The percentages with fax access and Internet access were also relatively low, at 16.3 percent and 17.6 percent respectively.

Couples with Children

The number of couple with children families has decreased by 4.4 percent since the 1996 Census. At the time of the 2001 Census there were 407,793 couples with children, down from 426,567 in 1996.

Of the 407,793 couples with children, there were 1,356 in which the couple was same sex. The majority (70.8 percent) of same-sex couples with children were female couples.

Most couples with children had either one or two children. The percentage with one child was 35.3 percent, up from 33.2 percent in 1991. A further 39.0 percent had two children, the same percentage as in 1991. The percentage of couples with three children has decreased from 19.3 percent in 1991 to 17.7 percent in 2001. Couples with four or more children were relatively rare, making up only 8.0 percent of families, down slightly from 8.4 percent in 1991.

The majority of couple with children families contained at least one dependent child, that is a child who was aged under 18 years and who was not employed full time. Only 16.6 percent did not have any dependent children. Of the 339,156 couples with dependent children, the majority had just one or two dependent children, with 34.4 percent having one dependent child and 40.4 percent having two dependent children.

Work and Labour Force Status

The work and labour force status of fathers in opposite-sex couples with dependent children did not change much between 1991 and 2001. In 2001, most fathers in opposite-sex couples with dependent children were employed full time, at 84.3 percent. The percentage of fathers in these families who were not in the labour force was 7.6 percent. For the mothers in these families, however, the percentages employed full time and part time have both increased since 1991, with a corresponding decrease in the percentage who were not in the labour force, as can be seen in Figure 2. In 2001, 36.8 percent of mothers in opposite-sex couples with dependent children were employed full time, up from 31.4 percent in 1991, while 30.9 percent were employed part time, up from 26.9 percent in 1991. The percentage of these mothers who were not in the labour force was 28.6 percent in 2001, down from 37.4 percent in 1991.

Mothers whose youngest dependent child was aged between 0 and 4 years were the most likely to not be in the labour force, at 43.1 percent. The percentage of mothers who were not in the labour force also varied according to the number of dependent children – mothers with four or more dependent children recorded the highest percentage not in the labour force, at 42.3 percent.

Figure 2

Work and Labour Force Status of Mothers in Opposite-sex Couples with Dependent Children, 1991, 1996 and 2001

Access to Telecommunication Systems and Access to Motor Vehicles

Of the three family types, household Internet access was highest for couples with children, at 55.3 percent. The percentage of couples with children that lived in households with access to a telephone was very high at 97.9 percent, while over a third (36.4 percent) of these families lived in households with access to a fax.

Couples with children also had a high level of motor vehicle access, with just 1.9 percent living in households that did not have motor vehicle access, and were almost twice as likely to be living in households with access to two motor vehicles (49.8 percent) as one motor vehicle (25.0 percent). Couples with children were the most likely family type to live in households with access to three or more motor vehicles, at 23.3 percent.

One-parent Families

The number of one-parent families has increased by 8.7 percent since 1996. At the time of 2001 Census there were 182,919 one-parent families, up from 168,258 in 1996.

One-parent families tended to have fewer children than two-parent families. Around half (52.9 percent) of one-parent families had just one child, compared with 35.3 percent of two-parent families, and 29.5 percent of one-parent families had two children compared with 39.0 percent of two-parent families.

There were 140,178 one-parent families that contained at least one dependent child (ie a child aged under 18 years and not employed full time), comprising about three-quarters of all one-parent families. Of one-parent families with dependent children, half had one dependent child, and 31.8 percent had two dependent children.

Characteristics of Parents in One-parent Families

Most parents in one-parent families were women, at 81.8 percent. These parents were most likely to be aged between 35 and 44 years. Only 1.4 percent were aged under 20 years. As can be seen in Figure 3, the one-parent family category includes some situations in which an older parent and adult children are living together.

Parents in one-parent families were more likely to be separated or divorced (with 20.1 percent separated and 21.5 percent divorced) than never married (34.2 percent). A further 13.5 percent were widowed, and 10.7 percent were married. The situation of married parents in one-parent families can occur when couples live in different locations for reasons such as employment.

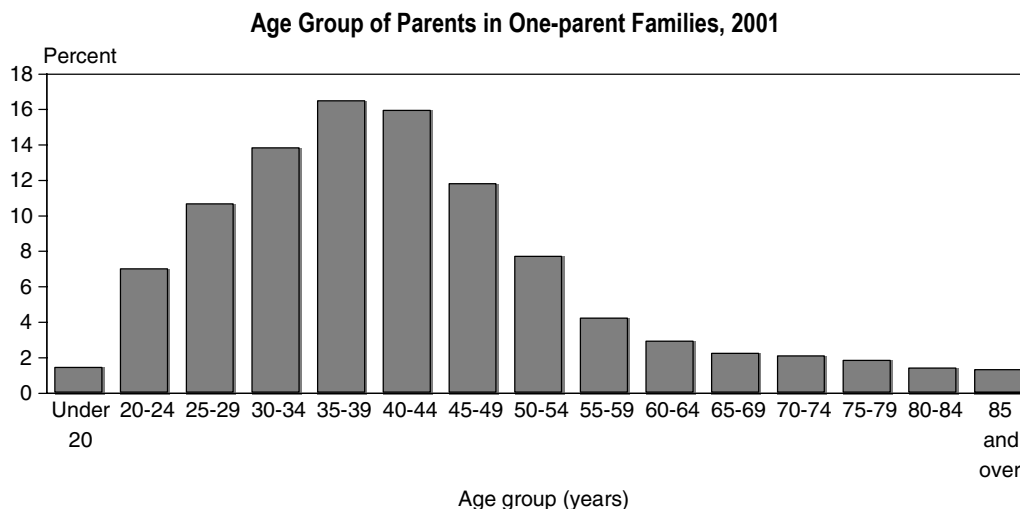

Sources of Income

The most common income source for sole parents with dependent children was the domestic purposes benefit, with 55.4 percent of these sole parents receiving this type of income during the past year. Wages, salary, commissions, bonuses, etc paid by employer was the next most common income source, at 50.2 percent. The percentage receiving wages, salary, commissions, bonuses, etc paid by employer varied according to the number of dependent children. Sole parents with one dependent child were the most likely to receive income from this source, at 54.2 percent, while sole parents with four or more dependent children were the least likely to receive income from this source, at 32.2 percent.

Work and Labour Force Status

The percentage of sole parents with dependent children who were employed full time has increased since 1991, with 30.3 percent employed full time in 2001, up from 21.6 percent in 1991. The percentage of these parents who were employed part time also increased over this time period, with 19.1 percent employed part time in 2001, compared with 9.5 percent in 1991.

Figure 3

Although nearly 4 in 10 (39.2 percent) sole parents with dependent children were not in the labour force, down from 57.2 percent in 1991, this situation was most common among those whose youngest dependent child was aged 0 to 4 years. More than half (56.1 percent) of sole parents whose youngest dependent child was aged 0 to 4 years were not in the labour force, compared with just 22.7 percent of sole parents whose youngest dependent child was aged 15 to 17 years. Sole parents whose youngest dependent child was aged between 10 and 17 years were more likely to be employed full time than to be not in the labour force.

The work and labour force status of sole parents with dependent children was also related to the number of dependent children in the family. Sole parents with one dependent child were almost as likely to be employed full time (34.8 percent) as to be not in the labour force (35.7 percent). In contrast, sole parents with two or more dependent children were more likely to be not in the labour force than to be employed full time. This was particularly apparent for sole parents with four or more dependent children, of whom 54.7 percent were not in the labour force and just 17.1 percent were employed full time.

Tenure, Access to Telecommunication Systems and Access to Motor Vehicles

One-parent families were less likely than other families to live in a dwelling that was owned rather than rented. Around half (48.9 percent) of one-parent families lived in owned dwellings compared with around three-quarters of other families.

Although the level of telephone access was very high for families overall, it was lower for one-parent families than for other family types, with 91.6 percent of one-

parent families living in households that had access to a telephone. One-parent families also had the lowest levels of access to a fax and the Internet, with 16.1 percent in households with access to a fax and 29.4 percent in households with access to the Internet. The same pattern was evident for motor vehicle access. One-parent families had the lowest level of motor vehicle access, with 15.5 percent of these families living in households that did not have access to a motor vehicle, compared with just 3.0 percent of couples without children and 1.9 percent of couples with children.

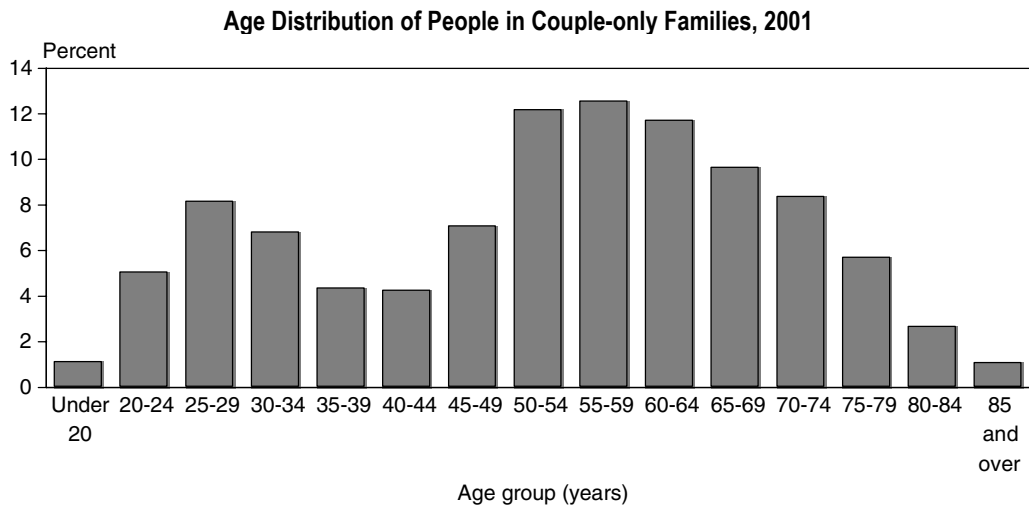

Couples without Children

Couples without children have increased by 6.3 percent since 1996. At the time of the 2001 Census there were 376,905 couples without children, up from 354,588 in 1996. Same-sex couples made up 1.0 percent of couples without children. There were 1,878 female couples without children and 1,836 male couples without children.

Age of People in Couple-only Families

People in couple-only families tended to fall into two age groups: those in their mid to late twenties or early thirties, or, to a greater extent, those in their fifties, sixties or early seventies, as can be seen in Figure 4. This reflects the two groups making up these couples: younger couples who have not had children, many of whom may have children in the future, and older couples whose children no longer live with them. People in same-sex couples without children tended to be relatively young, with 67.0 percent of the older partners and 84.5 percent of the younger partners under 50 years.

Figure 4

Tenure, Access to Telecommunication Systems and Access to Motor Vehicles

Over three-quarters (77.7 percent) of couple-only families lived in dwellings that were owned, with or without a mortgage. Of the three family types, couple-only families had the highest level of telephone access, with 98.8 percent living in households that had access to a telephone. Their level of access to a fax was very similar to that for families overall, at 30.0 percent, but their level of access to the Internet was a little lower than for families overall, at 38.8 percent. Only 3.0 percent of these families lived in households that did not have access to a motor vehicle, and a higher percentage of these families lived in households with access to two motor vehicles (48.5 percent) than one motor vehicle (35.4 percent).

Extended Families

In the census, an extended family is defined as a group of related people usually living together that consists of a family and one or more related people, or two or more related families, with or without other related people. Therefore, the extended family data from the census relates to extended families within households.

At the time of the 2001 Census, there were 64,929 extended families, down from 67,071 in 1996. Most of these families consisted of two, three or more generations. One-generation extended families (such as couples living with siblings or cousins) were relatively rare, making up only 5.8 percent of extended families.

Households

The number of households in private occupied dwellings has increased by 6.0 percent since 1996. At the time of the 2001 Census there were 1,344,267 households in private occupied dwellings compared with 1,268,094 in 1996.

Over two-thirds of households contained one family, at 69.1 percent, down from 72.2 percent in 1991. The percentage of households consisting of one person has increased since 1991, as can be seen in Figure 5. In 2001, 23.4 percent of households consisted of one person, up from 20.2 percent in 1991. One-person households were proportionally most common in the West Coast Region, at 29.7 percent, and least common in the Auckland Region, at 20.4 percent.

Households containing two or more families, or a group of people who did not form a family (such as siblings or 'flatmates') continued to make up a small proportion of households at 2.2 percent and 5.4 percent respectively. Half of households containing two or more families were in the Auckland Region.

Household Size

Households containing just one or two usual residents made up over half of New Zealand households, at 56.6 percent, up from 54.0 percent in 1996 and 52.9 percent in 1991. This increase is related to a variety of factors including the ageing of the population and delayed childbearing. Households with three or four usual residents were less common, at 16.6 percent and 15.1 percent respectively. Households with eight or more usual residents were rare, making up just 0.8 percent of New Zealand households.

Tenure, Access to Telecommunication Systems and Access to Motor Vehicles

About two-thirds of households owned or partly owned (with or without a mortgage) the dwelling they lived in. Couple-only households were the most likely to own the dwelling, at 79.6 percent, followed by couple with children households, at 77.0 percent. Households of related and unrelated people were the least likely to own the dwelling, at 26.8 percent, followed by households of unrelated people, at 31.3 percent. Of those households who owned the dwelling, one-person households were the most likely to own it without a mortgage, at 71.6 percent.

Figure 5

Household Composition, 1991, 1996 and 2001

Household composition	1991	1996	2001
	Percent		
One family	72.2	71.3	69.1
Two or more families	1.7	2.6	2.2
Other multiperson	5.9	5.4	5.4
One person	20.2	20.7	23.4

Most households had access to a telephone (96.3 percent). Over a third (37.4 percent) of households had access to the Internet, but the percentage with Internet access varied widely from 56.4 percent for couple with children households to just 16.3 percent for one-person households, as shown in Figure 6. Having access to a fax was less common than having access to the Internet, with only about a quarter of households having fax access.

Overall, 3.6 percent of households did not have access to any telecommunication systems, but some types of households were more likely to lack telecommunication systems access than others. Only 1.0 percent of couple-only households did not have access to any telecommunication systems, whereas 7.7 percent of households consisting of a one-parent family did not have access to any telecommunication systems.

About 9 out of 10 households (89.9 percent) had access to at least one motor vehicle. Some types of households, however, were more likely to have motor vehicle access than others. Couple with children households and couple-only households had the highest percentages with motor vehicle access, at 98.3 percent and 97.1 percent respectively. Households consisting of related people and two one-parent families were less likely to have motor vehicle access, at 82.5 percent for households of related people and 82.6 percent for households containing two one-parent families. One-person households were the least likely household type to have motor vehicle access. More than a quarter (26.1 percent) of one-person households did not have motor vehicle access.

Selected Summary Characteristics
for Families in Private Occupied Dwellings,
1991, 1996 and 2001

Selected Summary Characteristics	Census Year		
	1991	1996	2001
Number of Motor Vehicles(5)			
Number of Families in Households with:			
No Motor Vehicles	58,401	62,508	46,521
One Motor Vehicle	378,048	353,427	324,387
Two Motor Vehicles	327,414	380,349	423,693
Three or More Motor Vehicles	105,660	137,358	159,963
Not Stated	13,077	15,855	13,056
Total	882,600	949,497	967,617

- (1) 1996 excludes families where family type was not classifiable.
- (2) In 1991 the highest income category was \$70,001 or More. For 1996 and 2001 this category is made up of the \$70,001-\$100,000 and \$100,001 or More categories.
- (3) In 1991 this includes Not Available and Not Specified; in 1996 this includes Unidentifiable and Not Specified; in 2001 this includes Not Stated.
- (4) Not Stated and Not Specified refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.
- (5) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.
- (6) Includes dwellings that are provided free.
- (7) No data available from the 1991 Census for households with access to a telephone.
- (8) No data available from the 1991 and 1996 Censuses for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

Selected Summary Characteristics
for Couples without Children in
Private Occupied Dwellings, 1991, 1996 and 2001

Selected Summary Characteristics	Census Year		
	1991	1996	2001
Number of Motor Vehicles(6)			
Number of Couples without Children in Households with:			
No Motor Vehicles	12,699	13,989	11,166
One Motor Vehicle	148,818	142,911	132,087
Two Motor Vehicles	119,184	153,765	180,786
Three or More Motor Vehicles	22,350	38,529	49,053
Not Stated	3,981	5,391	3,810
Total	307,029	354,588	376,905

- (1) Same-sex couple data is not available for 1991.
- (2) Counts people, not families.
- (3) In 1991 the highest income category was \$70,001 or More. For 1996 and 2001 this category is made up of the \$70,001-\$100,000 and \$100,001 or More categories.
- (4) In 1991 this includes Not Available and Not Specified. In 1996 this includes Unidentifiable and Not Specified. In 2001 this includes Not Stated.
- (5) Not Stated and Not Specified refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.
- (6) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.
- (7) Includes dwellings that are provided free.
- (8) No data available from the 1991 Census for households with access to a telephone.
- (9) No data available from the 1991 and 1996 Censuses for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

Three or More Motor Vehicles	22,350	38,250	48,486
Not Stated	3,981	5,331	3,756
Total	307,029	352,017	373,191

- (1) Includes Partnered, Not Further Defined, Non-partnered, Not Further Defined, Non-partnered, Never Married, Non-partnered, Separated, Non-partnered, Divorced, Non-partnered, Widowed, and Not Stated and cases where a partner was temporarily absent from the dwelling.
- (2) In 1991 the highest income category was \$70,001 or More. For 1996 and 2001 this category is made up of the \$70,001-\$100,000 and \$100,001 or More categories.
- (3) Includes Not Stated and cases where a partner was temporarily absent from the dwelling.
- (4) In 1991 this includes Not Available and Not Specified; in 1996 this includes Unidentifiable and Not Specified; in 2001 this includes Not Stated.
- (5) Not Stated and Not Specified refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.
- (6) The headings refer to the work and labour force status of the mother. The subheadings refer to the work and labour force status of the father.
- (7) In 1991 this includes cases where a parent was temporarily absent from the dwelling; in 1996 this includes Not Applicable and cases where a parent was temporarily absent from the dwelling; in 2001 this includes Work and Labour Force Status Unidentifiable and cases where a parent was temporarily absent from the dwelling.
- (8) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.
- (9) Includes dwellings that are provided free.
- (10) No data available from the 1991 Census for households with access to a telephone.
- (11) No data available from the 1991 and 1996 Censuses for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

Selected Summary Characteristics
for *Opposite-sex Couples with Child(ren) in*
Private Occupied Dwellings,
1991, 1996 and 2001

Selected Summary Characteristics	Census Year		
	1991	1996	2001
Number of Motor Vehicles(9)			
Number of Opposite-sex Couples with Child(ren) in Households with:			
No Motor Vehicles	11,982	12,807	7,701
One Motor Vehicle	152,847	128,514	100,200
Two Motor Vehicles	180,678	192,744	200,121
Three or More Motor Vehicles	73,974	86,028	93,828
Not Stated	4,332	5,790	4,584
Total	423,813	425,883	406,437

- (1) Counts children, not families.
- (2) Includes Partnered, Not Further Defined, Non-partnered, Not Further Defined, Non-partnered, Never Married, Non-partnered, Separated, Non-partnered, Divorced, Non-partnered, Widowed, and Not Stated and cases where a parent was temporarily absent from the dwelling.
- (3) In 1991 the highest income category was \$70,001 or More. For 1996 and 2001 this category is made up of the \$70,001-\$100,000 and \$100,001 or More categories.
- (4) In 1991 and 1996 this includes Not Specified and cases where a parent was temporarily absent from the dwelling. In 2001 this includes Not Stated and and cases where a parent was temporarily absent from the dwelling.
- (5) In 1991 this includes Not Available and Not Specified; in 1996 this includes Unidentifiable and Not Specified; in 2001 this includes Not Stated.
- (6) Not Stated and Not Specified refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.
- (7) The headings refer to the work and labour force status of the mother. The subheadings refer to the work and labour force status of the father.
- (8) In 1991 this includes cases where a parent was temporarily absent from the dwelling; in 1996 this includes Not Applicable and cases where a parent was temporarily absent from the dwelling; in 2001 this includes Work and Labour Force Status Unidentifiable and cases where a parent was temporarily absent from the dwelling.
- (9) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.
- (10) Includes dwellings that are provided free.
- (11) No data available from the 1991 Census for households with access to a telephone.
- (12) No data available from the 1991 and 1996 Censuses for households with access to fax and/or the Internet.

Not Stated	30	57
Total	684	1,356

(1) Same-sex couple data is not available for 1991.

(2) Counts children, not families.

(3) In 1996 this includes Not Specified and cases where a partner was temporarily absent from the dwelling; in 2001 this includes Response Unidentifiable, Not Stated and cases where a partner was temporarily absent from the dwelling.

(4) Includes cases where the younger partner was the same age in complete years as the older partner.

(5) In 1996 this includes Not Specified and cases where a partner was temporarily absent from the dwelling; in 2001 this includes Not Stated and cases where a partner was temporarily absent from the dwelling.

(6) In 1996 this includes Response Unidentifiable and Not Specified; in 2001 this includes Not Stated.

(7) Not Specified and Not Stated refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.

(8) The headings refer to the work and labour force status of the older partner. The subheadings refer to the work and labour force status of the younger partner.

(9) In 1996 this includes Not Applicable and cases where a partner was temporarily absent from the dwelling; in 2001 this includes Work and Labour Force Status Unidentifiable and cases where a partner was temporarily absent from the dwelling.

(10) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.

(11) Includes dwellings that are provided free.

(12) No data is available from the 1996 Census for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

(1) This table cross-tabulates personal characteristics with family characteristics. It counts families.

(2) Excludes the categories of Couples with Adult Child(ren) and at Least One Child with Unknown Dependency Status and Couples with Child(ren), All Dependency Status Unknown.

(3) The headings relate to the age group of the mother. The subheadings relate to the age group of the father.

All cells in this table have been randomly rounded to base 3.

(1) This table cross-tabulates personal characteristics with family characteristics. It counts families.

(2) Excludes the categories of Couples with Adult Child(ren) and at Least One Child with Unknown Dependency Status and Couples with Child(ren), All Dependency Status Unknown.

(3) The headings relate to the total personal income of the mother. The subheadings relate to the total personal income of the father.

(4) This includes Not Stated and cases where a parent was temporarily absent from the dwelling.

All cells in this table have been randomly rounded to base 3.

Selected Summary Characteristics
for Same-sex Couples with Dependent Child(ren)⁽¹⁾
in Private Occupied Dwellings, 1996 and 2001⁽²⁾

Selected Summary Characteristics	Census Year	
	1996	2001
Total		
Employed Full-Time	270	492
Employed Part-Time	54	138
Unemployed and Actively Seeking Work	36	87
Not in Labour Force	135	255
Not Elsewhere Included(4)(9)	69	192
Total	564	1,167
Tenure of Household(10)		
Percent of Same-sex Couples with Dependent Children in Households in:		
Rented Dwellings(11)	39.3	45.3
Dwellings Owned with or without a Mortgage	60.1	54.2
Access to Telecommunication Systems(10)		
Percent of Same-sex Couples with Dependent Children in:		
Access to a Telephone	91.7	91.9
Access to a Fax(12)	..	25.3
Access to the Internet(12)	..	40.9
Number of Motor Vehicles(10)		
Number of Same-sex Couples with Dependent Children in Households with:		
No Motor Vehicles	45	78
One Motor Vehicle	201	369
Two Motor Vehicles	225	483
Three or More Motor Vehicles	72	186
Not Stated	21	54
Total	564	1,167

(1) Excludes the categories of Couples with Adult Child(ren) and at Least One Child with Unknown Dependency Status and Couples with Child(ren), All Dependency Status Unknown.

(2) Same-sex couple data is not available for 1991.

(3) In 1996 this includes Not Specified and cases where a partner was temporarily absent from the dwelling; in 2001 this includes Response Unidentifiable, Not Stated and cases where a partner was temporarily absent from the dwelling.

(4) Includes cases where the younger partner was the same age in complete years as the older partner.

(5) In 1996 this includes Not Specified and cases where a partner was temporarily absent from the dwelling; in 2001 this includes Not Stated and cases where a partner was temporarily absent from the dwelling.

(6) In 1996 this includes Response Unidentifiable and Not Specified; in 2001 this includes Not Stated.

(7) Not Specified and Not Stated refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.

(8) The headings refer to the work and labour force status of the older partner. The subheadings refer to the work and labour force status of the younger partner.

(9) In 1996 this includes Not Applicable and cases where a partner was temporarily absent from the dwelling; in 2001 this includes Work and Labour Force Status Unidentifiable and cases where a partner was temporarily absent from the dwelling.

(10) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.

(11) Includes dwellings that are provided free.

(12) No data is available from the 1996 Census for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

(1) This table cross-tabulates personal characteristics with family characteristics. It counts families.

(2) Parent includes people in parent roles such as older siblings or grandparents. This means that the age group of the parent and the age group of the youngest child may not always be as expected.

All cells in this table have been randomly rounded to base 3.

Selected Summary Characteristics
for One Parent with Dependent Child(ren)⁽¹⁾ Families
in Private Occupied Dwellings,
1991, 1996 and 2001

Selected Summary Characteristics	Census Year		
	1991	1996	2001
Access to Telecommunication Systems(8)			
Percent of One Parent with Dependent Child(ren) Families in Households with:			
Access to a Telephone(10)	..	85.1	90.0
Access to a Fax(11)	15.2
Access to the Internet(11)	28.8
Number of Motor Vehicles(8)			
Number of One Parent with Dependent Child(ren) Families			
No Motor Vehicles	28,224	30,147	23,121
One Motor Vehicle	59,874	65,733	75,654
Two Motor Vehicles	15,273	19,932	27,315
Three or More Motor Vehicles	4,908	7,314	10,335
Not Stated	3,795	3,456	3,750
Total	112,071	126,582	140,175

- (1) Excludes the categories of One Parent with Adult Child(ren) and at Least One Child with Unknown Dependency Status and One Parent with Child(ren), All Dependency Status Unknown.
- (2) In 1991 and 1996 this includes Not Specified and cases where a parent was temporarily absent from the dwelling; in 2001 this includes Response Unidentifiable, Not Stated and cases where a parent was temporarily absent from the dwelling.
- (3) In 1991 the highest income category was \$70,001 or More. For 1996 and 2001 this category is made up of the \$70,001-\$100,000 and \$100,001 or More categories.
- (4) In 1991 and 1996 this includes Not Specified and cases where a parent was temporarily absent from the dwelling; in 2001 this includes Not Stated and cases where a parent was temporarily absent from the dwelling.
- (5) In 1991 this includes Not Available and Not Specified; in 1996 this includes Unidentifiable and Not Specified; in 2001 this includes Not Stated.
- (6) Not Stated and Not Specified refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.
- (7) In 1991 this includes cases where a parent was temporarily absent from the dwelling; in 1996 this includes Not Applicable and cases where a parent was temporarily absent from the dwelling; in 2001 this includes Work and Labour Force Status Unidentifiable and cases where a parent was temporarily absent from the dwelling.
- (8) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.
- (9) Includes dwellings that are provided free.
- (10) No data available from the 1991 Census for households with access to a telephone.
- (11) No data available from the 1991 and 1996 Censuses for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

Table 31

Selected Summary Characteristics
for Extended Families in Private Occupied
Dwellings, 1996 and 2001

Selected Summary Characteristics	Census Year	
	1996	2001
Extended Family Type		
One-generation Extended Family	4,833	3,756
Two-generation Extended Family	29,265	27,831
Three- or More Generation Extended Family	32,970	33,168
Extended Family Not Classifiable	-	171
Total	67,071	64,929
Number of Usual Residents Aged 15 Years and Over		
One Usual Resident	24	9
Two Usual Residents	8,295	8,862
Three Usual Residents	28,998	29,205
Four or More Usual Residents	29,754	26,853
Total	67,068	64,929
Age Group of Youngest Child		
0-4 Years	28,503	25,617
5-9 Years	10,227	11,079
10-14 Years	6,138	7,395
15-17 Years	3,360	2,616
18-19 Years	1,347	1,245
20-24 Years	2,316	1,857
25-29 Years	972	945
30 Years and Over	993	1,071
Total	53,856	51,822
Tenure of Household(1)		
Percent of Extended Families in Households in:		
Rented Dwellings(2)	35.9	39.6
Dwellings Owned with or without a Mortgage	64.1	60.4
Access to Telecommunication Systems(1)		
Percent of Extended Families in Households with:		
Access to a Telephone	91.6	93.9
Access to a Fax(3)	..	25.0
Access to the Internet(3)	..	38.5
Number of Motor Vehicles(1)		
Number of Extended Families in Households with:		
No Motor Vehicles	6,870	4,584
One Motor Vehicle	20,001	17,550
Two Motor Vehicles	21,438	22,326
Three or More Motor Vehicles	17,052	18,885
Not Stated	1,710	1,584
Total	67,068	64,929

(1) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.

(2) Includes dwellings that are provided free.

(3) No data available from the 1996 Census for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

Table 32

Sources of Extended Family Income (Total Responses)⁽¹⁾
by Extended Family Type
for Extended Families in Private Occupied Dwellings, 2001

Sources of Extended Family Income (Total Responses)	Extended Family Type				Total
	One-Generation Extended Family	Two-Generation Extended Family	Three- or More Generation Extended Family	Extended Family Not Classifiable	
Wages, Salary, Commissions, Bonuses, etc Paid by Employer	3,294	22,917	25,785	141	52,137
Self-employment or Business	978	6,966	7,107	51	15,105
Interest, Dividends, Rent, Other Investments	1,227	6,747	6,807	54	14,832
Regular Payments from ACC or a Private Work Accident Insurer	192	1,245	1,392	6	2,835
New Zealand Superannuation or Veterans Pension	345	3,348	8,508	36	12,234
Other Superannuation, Pensions, Annuities (Other than NZ Superannuation, Veterans Pension or War Pension)	141	1,101	2,520	12	3,774
Community Wage - Job Seeker	828	7,137	7,332	39	15,336
Community Wage - Sickness Benefit	186	2,052	3,444	9	5,694
Domestic Purposes Benefit	66	5,607	10,896	24	16,596
Invalids Benefit	198	1,545	2,664	9	4,419
Student Allowance	507	3,084	2,778	21	6,396
Other Government Benefits, Government Income Support Payments, or War Pensions	234	3,522	6,468	18	10,242
Other Sources of Income, Including Support Payments from People Living in Other Households	186	1,449	1,614	6	3,258
No Source of Income or Income Sources Not Stated	36	420	456	6	915
Total	3,753	27,834	33,171	171	64,929

(1) Includes all of the extended families which stated each source of extended family income, whether as the only source of extended family income or as one of several sources of extended family income. Where an extended family reported more than one source of income, it has been counted in each applicable group.

All cells in this table have been randomly rounded to base 3.

Total	2,124	2,289	1,620

- (1) In 1991 the highest income category was \$70,001 or More. For 1996 and 2001 this category is made up of the \$70,001-\$100,000 and \$100,001 or More categories.
- (2) In 1991 this includes Not Available and Not Specified; in 1996 this includes Unidentifiable and Not Specified; in 2001 this includes Not Stated.
- (3) Not Stated and Not Specified refer to instances where one or more family members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the family income was not already in the highest income category.
- (4) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.
- (5) No data available from the 1991 Census for households with access to a telephone.
- (6) No data available from the 1991 and 1996 Censuses for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

- (1) In 1991 and 1996 the 2-parent families in these households did not necessarily have children. For 2001, 2-family households in which one or both families did not have children (ie were couple-only families) are classified in other 2-family household.
- (2) Category previously titled 'Household Not Classifiable'.
- (3) Incomplete households.
- (4) Not available for 1991 or 1996.
- (5) Households with no children or adult children only.
- (6) Total Household Income excludes any incomplete households.
- (7) In 1991 loss and zero income were output in one category.
- (8) In 1991 the highest income category was \$70,001 or More. For 1996 and 2001 this category is made up of the \$70,001-\$100,000 and \$100,001 or More categories.
- (9) In 1991 this includes Not Available and Not Specified; in 1996 this includes Not Specified; in 2001 this includes Not Stated.
- (10) Not Specified and Not Stated refer to cases where one or more household members aged 15 years and over were temporarily absent from the dwelling or did not state their income, and the household income was not already in the highest income category.
- (11) This data is collected at the household level, not the family level. Where a household has more than one family, the circumstances of each family in the household may differ.
- (12) Includes dwellings that are provided free.
- (13) No data available from the 1991 Census for households with access to a telephone.
- (14) No data available from the 1991 and 1996 Censuses for households with access to fax and/or the Internet.

All cells in this table have been randomly rounded to base 3.

Explanatory Notes

2001 Census Data Quality

For the 2001 Census of Population and Dwellings, Statistics New Zealand put in place a Quality Management Strategy (QMS) to ensure data from the census was fit for use. The QMS identified key actions Statistics New Zealand was to undertake during all phases of the 2001 Census cycle to ensure data quality.

At the processing phase of the census, certain quality assurance procedures were implemented to ensure that the data was recorded accurately and that any inconsistencies were minimised as the data was coded. These processes did not attempt to change the respondents' answers. The objective was to minimise introduced error in the data.

This strategy means that some inconsistencies may remain in the census data. There may, for example, be slight inconsistencies in table totals for some variables. These inconsistencies do not affect the fitness for use of data.

Further information on data quality in the 2001 Census can be found in chapter 7 of *Introduction to the Census*.

Family

A family is defined as two or more people living in the same household who comprise either a couple, with or without children, or one parent and their children. The children do not have partners or children of their own living in the same household. People who were temporarily away from home on census night are included as part of the family.

This definition excludes parents and children who live in different households, so the family data presented in this report relates to families within households.

Parent

A parent is the natural, step, adopted or foster parent or person in a parent role to a child in a family. People who are in a parent role may include grandparents, aunts and uncles, older siblings or other related or unrelated people. The parent and child must be usually resident in the same household.

Child in a Family

To be classified as a child in a family, a person must be living with at least one parent, and not have a partner or children of their own living in the same household. A child in a family can be of any age. If a child lives with their parents, but has a partner or children of their own living in the same household, they form a family with their partner or children, separate from that of their parents.

A person who is under 15 and does not live with their parents is included in a family as a child, with a couple or person in a parent role to them.

Dependent Child

A child in a family who is aged less than 18 years and who is not employed full time.

Family Type

Family type is the derived variable that classifies families according to the presence or absence of couples, parents and children. There are three types of families: couple without children, couple with children, and one parent with children.

Families classified as one parent with children include cases in which the children spend some of their time living with one parent, and some of their time living with the other parent. For the purposes of the census, the children are counted at the household where they spend most nights. If they spend equal amounts of time at different households, they are counted at one of those households.

Extended Families

An extended family is a family and one or more related people living in the same household, or two or more related families, with or without other related people living in the same household. People who were temporarily away from home on census night are included as part of the extended family.

This definition excludes related families and related people who live in different households, so the extended family data presented in this report relates to extended families within households.

Household

A household is one person who usually lives alone, or two or more people who usually live together and share facilities, such as eating or cooking facilities. People who were temporarily away from home on census night are included as part of the household. A household may contain one or more families, other people in addition to a family or families, a group of people who do not form a family, or one person.

Total Family Income

Total personal income is collected in income ranges (for example \$25,001 - \$30,000), and not as an actual dollar income (for example \$29,500). In order for total family income to be calculated, a median income is determined for each total personal income range. Total family income is derived by adding together the median total personal incomes of each member of the family aged 15 years and over. As a result of this calculation, a family income category is assigned to the family. Total family income is output using the same income ranges as total personal income.

Total family income data is affected by absentees and people who did not answer the income question. The total personal income of an absentee is not able to be included in the calculation of total family income. When a family has one or more absentees aged 15 years or over the family income is set to 'not stated', unless the accumulated family income is already \$100,001 or more. Likewise, if someone in the family has not stated their income, the income for the whole family is set to 'not stated' unless the \$100,001 or more threshold has already been reached. This has affected the quality of total family income data and care should be taken when using it. Overall the proportion of families with no stated income is 16.1 percent, with 11.5 percent of couples without children, 18.7 percent of couples with children and 19.9 percent of one-parent with children families not stating an income. Families with no stated income have been excluded from the analysis in the highlights.

Caution should be exercised when comparing family income across time, as the data has not been adjusted for inflation, so an apparent increase in family income may not be a real increase once inflation has been taken into account. Caution should also be taken when comparing income levels of different family types due to the effect on economic well-being of different numbers of people in a family. A lower income level for one family type compared with another family type does not necessarily imply a lower level of economic well-being because there may be fewer people in that family type. The same cautions apply when comparing household income across time or comparing income levels of different household types.

Total Household Income

Household income is calculated in a similar way to family income, except that all people in the household aged 15 years and over are included in the calculation. Absentees and people who did not answer the income question are treated the same way as for family income. This has affected the quality of the total household income data, the effect becoming more marked as the number of people in the household increases. The proportion of households not stating an income were as follows: 11.4 percent for one-person households; 17.6 percent for one-family households (with or without other people); 24.8 percent for other multiperson households; 37.0 percent for two-family households (with or without other people) and 49.4 percent for three-family households (with or without other people).

Temporary Private Dwelling

Caravans, cabins, tents and other makeshift dwellings that are the principal or usual residence of households are classified as temporary private dwellings, whether they are occupied or unoccupied. Park benches and other types of improvised shelter are counted as a dwelling if they are occupied by a person on census night.

General Terms and Definitions

General definitions can be found in *Definitions and Questionnaires*.
