Preface

Pacific Peoples contains final statistics from the Census of Population and Dwellings held on 6 March 2001. It is one of a series of reports that provide detailed statistics on the characteristics of New Zealand's population, households and dwellings.

The information in this report covers a wide variety of demographic, social and economic subjects for the Pacific peoples ethnic group(s). The tables in this report relate to the Pacific peoples ethnic group(s) census usually resident population count (ie people in the Pacific ethnic group(s) who normally live in New Zealand and who were in the country on census night).

The ethnicity question is one of several census questions in which people may provide more than one response. The tables in this report refer to total Pacific peoples ethnic group(s) responses. This means that tables include individuals who indicated a Pacific peoples ethnic group as their sole ethnic group, or as one of several ethnic groups.

This report provides information on the Pacific peoples ethnic group as well as the six largest Pacific peoples ethnic groups in New Zealand: Samoan, Cook Island Maori, Tongan, Niuean, Fijian, and Tokelauan.

Statistics New Zealand makes census data available to a wide range of people. The data is important to planners and policy-makers, researchers, community groups and the general public. A range of information from the 2001 Census has been published and is available free on the Statistics New Zealand website. More information will continue to be published and made available free on the website throughout 2002. In addition to published statistical information, Statistics New Zealand can provide customised information to meet the specific needs of users.

Statistics New Zealand acknowledges the contribution of New Zealanders in their overwhelming support of the 2001 Census, and of the large number of people involved in planning, collecting, processing and using the information.

Brian Pink
Government Statistician

Information Centre

Your gateway to Statistics New Zealand

Each year, we collect over 60 million pieces of information. New Zealanders tell us how and where they live; about their work, spending and recreation. We also collect a complete picture of business in New Zealand. This valuable resource is yours to use. But with all the sophisticated options available, finding exactly what you need can sometimes be a problem.

Giving you the answers

Our customer services staff provide the answer. They are the people who know what information is available, and how it can be used to your best advantage. Think of them as your guides to Statistics New Zealand. They operate a free enquiry service where answers can be quickly provided from published material. More extensive answers and customised solutions will incur costs, but we always give you a free no-obligation quote before going ahead.

Liability statement

Statistics New Zealand gives no warranty that the information or data supplied contains no errors. However, all care and diligence has been used in processing, analysing and extracting the information. Statistics New Zealand shall not be liable for any loss or damage suffered by the customer consequent upon the use directly, or indirectly, of the information supplied in this product.

Reproduction of material

Any table or other material published in this report may be reproduced and published without further licence, provided that it does not purport to be published under government authority and that acknowledgement is made of this source.

Standards

Symbols

The interpretation of the symbols used throughout this report is as follows:

- nil or zero
- amount too small to be expressed
- .. figures not available
- ... not applicable
- nfd not further defined
- nec not elsewhere classified
- C confidential

Confidentiality

The Statistics Act 1975 sets out strict requirements on Statistics New Zealand to protect the confidentiality of information obtained from respondents during the Census of Population and Dwellings and other surveys. Action is taken at every stage of the census to make sure that only authorised people work with individual returns, and then with only as much as they need to know for that stage of the process. All staff who work on the census and other surveys have signed a Declaration of Secrecy.

It is an offence for any staff member to break the statutory declarations of secrecy that they make, and there is a very long history and tradition of consistent performance with keeping confidences over many censuses. Such a record supports the high level of public trust in Statistics New Zealand, and has led to the high levels of response to the census by New Zealanders.

During the collection of documents, there were arrangements for forms to be collected in sealed envelopes, should that option be chosen by a household or person. The names and addresses of respondents were used to ensure that all forms were collected from a household and are not part of the final computerised information.

When the census paper forms have been processed, Statistics New Zealand continues to have clear, statutory obligations to maintain the confidentiality of the census data in its custody. The Statistics Act includes a section that overrides the legal investigative powers of other government

agencies to obtain information. In publishing statistical tables and other aggregated statistics from the census datasets, Statistics New Zealand employs measures such as random rounding to protect the confidentiality of individual information.

Random rounding

Since the 1981 Census, Statistics New Zealand has utilised a confidentiality assurance technique of randomly rounding census statistics to base three. This enables the greatest possible amount of census data to be released without compromising the privacy of individual responses.

Under the random rounding process, all table cell values, including row and column totals, are rounded as follows

1. Zero counts and counts which are already multiples of three are left unchanged.
2. Other counts are rounded to one or other of the two nearest multiples of three.

All rounding, including separate rounding of totals and sub-totals is carried out on the recorded results. The probabilities of rounding up or down are set so that the long run expected value equals the original count. For example, an original count of 17 would be rounded to 15 with a probability of 1/3 and rounded to 18 with a probability of 2/3, since $15 \times 1/3 + 18 \times 2/3 = 17$. The effect of this rounding on the accuracy of census statistics for practically any proposed use is insignificant.

Rounding procedures

On occasions, figures or percentages have been rounded off to the nearest unit or decimal point. This may result in a total disagreeing with the total of the individual items as shown in tables.

Calculation of ratios

Unless otherwise stated, the 'not stated' category has been excluded from the denominator in calculation of ratios and percentages.

List of Tables

1. Pacific peoples ethnic groups (total responses) and age group by sex for the census usually resident population count, 1991, 1996 and 2001	23
2. Regional council, urban and rural area and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count, 2001	25
3. Birthplace and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count, 2001	28
4. Years since arrival in New Zealand by Pacific peoples ethnic groups (total responses) for the overseas-born census usually resident population count, 2001	30
5. Language spoken (total responses) and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count, 2001	31
6. Religious affiliation (total responses) and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count, 2001	33
7. Highest qualification and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count aged 15 years and over, 2001	35
8. Sources of personal income (total responses) and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count aged 15 years and over, 2001	37
9. Total personal income and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count aged 15 years and over, 2001	39
10. Work and labour force status and sex by Pacific peoples ethnic groups (total responses) for the census usually resident population count aged 15 years and over, 2001	41
11. Status in employment and sex by Pacific peoples ethnic groups (total responses) for the employed census usually resident population count aged 15 years and over, 2001	42
12. Selected summary characteristics for the Pacific peoples ethnic group census usually resident population count, 1991, 1996 and 2001	43
13. Selected summary characteristics for the Samoan ethnic group census usually resident population count, 1991, 1996 and 2001	46
14. Selected summary characteristics for the Cook Island Maori ethnic group census usually resident population count, 1991, 1996 and 2001	49
15. Selected summary characteristics for the Tongan ethnic group census usually resident population count, 1991, 1996 and 2001	52
16. Selected summary characteristics for the Niuean ethnic group census usually resident population count, 1991, 1996 and 2001	55
17. Selected summary characteristics for the Fijian ethnic group census usually resident population count, 1991, 1996 and 2001	58
18. Selected summary characteristics for the Tokelauan ethnic group census usually resident population count, 1991, 1996 and 2001	61
19. Age group by sex for the Pacific peoples ethnic group census usually resident population count, 1991, 1996 and 2001	64

List of Tables *(continued)*

20. Regional council, urban and rural area and sex by age group for the Pacific peoples ethnic group census usually resident population count, 2001	65
21. Birthplace and sex by age group for the Pacific peoples ethnic group census usually resident population count, 2001	70
22. Years since arrival in New Zealand and sex by age group for the overseas-born Pacific peoples ethnic group census usually resident population count, 2001	71
23. Birthplace and sex by language spoken (total responses) for the Pacific peoples ethnic group census usually resident population count, 2001	72
24. Religious affiliation (total responses) and sex by age group for the Pacific peoples ethnic group census usually resident population count, 2001	76
25. Legal marital status and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	78
26. Social marital status and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	79
27. Tenure holder and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	80
28. Regional council and sex by tenure holder for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	81
29. Highest qualification and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	83
30. Sources of personal income (total responses) and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	84
31. Total personal income and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	86
32. Work and labour force status and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	88
33. Status in employment and sex by age group for the employed Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	89
34. Occupation (major group) and sex by age group for the employed Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	90
35. Industry (division) and sex by age group for the employed Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	91

List of Tables *(continued)*

36. Unpaid activities (total responses) and sex by age group for the Pacific peoples ethnic group census usually resident population count aged 15 years and over, 2001	93
37. Age group by sex for the Samoan ethnic group census usually resident population count, 1991, 1996 and 2001	94
38. Regional council, urban and rural area and sex by age group for the Samoan ethnic group census usually resident population count, 2001	95
39. Birthplace and sex by age group for the Samoan ethnic group census usually resident population count, 2001	100
40. Years since arrival in New Zealand by sex for the overseas-born Samoan ethnic group census usually resident population count, 2001	101
41. Language spoken (total responses) and sex by birthplace and age group for the Samoan ethnic group census usually resident population count, 2001	102
42. Religious affiliation (total responses) and sex by age group for the Samoan ethnic group census usually resident population count, 2001	105
43. Legal marital status and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	107
44. Social marital status and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	108
45. Tenure holder and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	110
46. Highest qualification and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	111
47. Sources of personal income (total responses) and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	112
48. Total personal income and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	114
49. Work and labour force status and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	116
50. Status in employment and sex by age group for the employed Samoan ethnic group census usually resident population count aged 15 years and over, 2001	117
51. Occupation (major group) and sex by age group for the employed Samoan ethnic group census usually resident population count aged 15 years and over, 2001	118
52. Industry (division) and sex by age group for the employed Samoan ethnic group census usually resident population count aged 15 years and over, 2001	119
53. Unpaid activities (total responses) and sex by age group for the Samoan ethnic group census usually resident population count aged 15 years and over, 2001	121
54. Age group by sex for the Cook Island Maori ethnic group census usually resident population count, 1991, 1996 and 2001	122

138. Unpaid activities (total responses) and sex by age group for the Tokelauan ethnic group census usually resident population count aged 15 years and over, 2001	266

Highlights

The information presented below is based on the Pacific peoples ethnic group(s) census usually resident population count. Comparisons with the total New Zealand census usually resident population count use figures from the *National Summary*. As well as discussing the Pacific peoples ethnic group as a whole, the highlights also discuss the six largest Pacific peoples ethnic groups in New Zealand: Samoan, Cook Island Maori, Tongan, Niuean, Fijian, and Tokelauan. References to the Fijian ethnic group exclude individuals who reported Fijian Indian/Indo-Fijian ethnicity.

Population

In 2001, 6.5 percent (231,798) of the resident New Zealand population identified as belonging to Pacific ethnic groups. This represented an increase of almost 15 percent (29,562) since 1996 – a slightly lower rate of increase than between 1991 and 1996 (21 percent). The Pacific population in New Zealand has continued to grow at a faster rate than the total New Zealand population. In the decade between 1991 and 2001 the Pacific population grew by almost 39 percent compared with 11 percent for the New Zealand population overall. In 1991, Pacific peoples made up 5.0 percent of the resident New Zealand population and numbered 167,070.

Almost half (49 percent) of the Pacific population in New Zealand is Samoan. The next largest Pacific ethnic group is Cook Island Maori (23 percent), followed by the Tongan (18 percent), Niuean (9 percent), Fijian (3 percent) and Tokelauan (3 percent) ethnic groups. As figure 1 illustrates, the ethnic groups with the highest rates of population growth between 1991 and 2001 were Tongan (76 percent) and Tokelauan (50 percent).

Age and Sex

The Pacific population remains more youthful than the national population. The median age of Pacific peoples living in New Zealand in 2001 was 21.0 years. By comparison, the median age for the total New Zealand population was 34.8 years. As in 1996, almost 40 percent of the Pacific population was aged under 15 years in 2001. The youngest Pacific ethnic groups were the Tokelauan and Cook Island Maori groups (median age 18.8 years) while the Fijian group was the oldest (median age 23.7 years). Tokelauans were the only Pacific ethnic group to experience a decrease in their median age between 1996 and 2001 (from 19.3 years to 18.8 years).

Following the national trend, the age structure of the Pacific population is gradually ageing. Over the last decade, the proportion of Pacific people aged 45 years and over increased from 12 percent in 1991 to 15 percent in 2001. The median age of the Pacific population increased from 20.5 to 21.0 over the same period.

Just over half of the Pacific population in 2001 was female (50.8 percent). Although males outnumbered females in the 0-14 age group (51.2 percent compared with 48.8 percent), females outnumbered males in all other age groups. The greatest difference occurred in the 65 years and over age group, where females formed 57 percent of the Pacific population.

(1) Includes all of the people who stated each Pacific peoples ethnic group, whether as their only Pacific peoples ethnic group or as one of several Pacific peoples ethnic groups. Where a person reported more than one Pacific peoples ethnic group, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each religious affiliation, whether as their only religious affiliation or as one of several religious affiliations. Where a person reported more than one religious affiliation, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each unpaid activity, whether as their only unpaid activity or as one of several unpaid activities. Where a person reported more than one unpaid activity, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each unpaid activity, whether as their only unpaid activity or as one of several unpaid activities. Where a person reported more than one unpaid activity, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each unpaid activity, whether as their only unpaid activity or as one of several unpaid activities. Where a person reported more than one unpaid activity, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each religious affiliation, whether as their only religious affiliation or as one of several religious affiliations. Where a person reported more than one religious affiliation, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each unpaid activity, whether as their only unpaid activity or as one of several unpaid activities. Where a person reported more than one unpaid activity, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

(1) Includes all of the people who stated each unpaid activity, whether as their only unpaid activity or as one of several unpaid activities. Where a person reported more than one unpaid activity, they have been counted in each applicable group.

(2) Three alternative age groupings have been provided for older people: 65 Years and Over, 75 Years and Over, and 85 Years and Over.

All cells in this table have been randomly rounded to base 3.

Explanatory Notes

2001 Census Data Quality

General

For the 2001 Census of Population and Dwellings, Statistics New Zealand put in place a Quality Management Strategy (QMS) to ensure data from the census was fit for use. The QMS identified key actions Statistics New Zealand were to undertake during all phases of the 2001 Census cycle to ensure data quality.

At the processing phase of the census, certain quality assurance procedures were implemented to ensure that the data was recorded accurately and that any inconsistencies were minimised as the data was coded. These processes did not attempt to change the respondents' answers. The objective was to minimise introduced error in the data.

This strategy means that some inconsistencies may remain in the census data. There may, for example, be slight inconsistencies in table totals for some variables. These inconsistencies **do not** affect the fitness for use of data.

Further information on data quality in the 2001 Census can be found in chapter 7 of *Introduction to the Census*.

Data quality of income questions

The income question is not as well answered as other questions in the census for a variety of reasons. These include: social aversion (including a perceived connection to IRD); embarrassment due to low income; proxy form fillers not knowing incomes (this particularly affects people in hospitals and retirement homes); pooling of household incomes (family businesses, shared investments), individuals not handling the 'books' or not knowing the gross amount received from a benefit or pension. This has resulted in a higher non-response rate than for other questions. Groups particularly affected are the elderly, the young (who usually give less detail), women, those in receipt of a benefit or pension and certain ethnic groups.

The non-response rate for the total personal income question for Pacific peoples was 18.8 percent, which compares with the non-response rate for the total census usually resident population of 11.1 percent. The degree of non-response for the Pacific peoples ethnic group distorts the income distribution, meaning care should be taken when undertaking detailed analysis of income for this ethnic group.

Ethnicity

This note is to assist users of census information on ethnicity. Changes to the form of the ethnicity questions used in the 1996 and 2001 Census of Population and Dwellings have resulted in some data that is not consistent between 1991 and 1996 or between 1996 and 2001. This applies particularly to the 'European' ethnic groups, including the 'New Zealand European' ethnic group, but also to the 'Māori' ethnic group. Data between 1991 and 2001 may not be affected.

To measure real effects of population change, comparison should be made between 1991 and 2001 Census data.

Changes in the ethnicity question

The ethnicity question in the 1996 Census had a different format from that used in 1991 and 2001. In 1996, there was an answer box for 'Other European' with additional drop down answer boxes for 'English', 'Dutch', 'Australian', 'Scottish', 'Irish', 'other'. These were not used in 1991 and 2001.

Furthermore, the first two answer boxes for the question were in a different order from those of 1991 and 2001. 'NZ Maori' was listed first and 'NZ European or Pakeha' was listed second in 1996. The 1991 and 2001 questions also used the words 'New Zealand European' rather than 'NZ European or Pakeha'. The 2001 question used the word 'Māori' rather than 'NZ Maori'.

In all three years, people could provide more than one response to the question, for example Māori and Samoan. The wording of the 1996 question made it more explicit that respondents could tick more than one box for the ethnicity question.

Copies of the layout of the questions are contained in the more detailed technical paper referred to later in this note.

Impact on data

Some data from the 1996 ethnicity question is not consistent with data from 1991 and 2001. This is due in part to the effect of the different question format rather than an effect of real change.

1. There have been increased counts for the additional 'Other European' categories from 1996. The increase was restricted to the 1996 data, with 1991 and 2001 being at much lower levels.
2. There was also a drop in 1996 in the level for some categories such as 'European not further defined'. This again is a result of people in 1996 ticking the additionally specific 'other European' categories but in 1991 or 2001 just writing 'British' or 'European'.

3. The count for the 'NZ European or Pakeha' category decreased in 1996 compared with that of 1991 and 2001. This may have been because some people in 1996 saw the additional 'other European' categories as better describing their ethnicity and so answered these rather than the 'NZ European or Pakeha' category. There may also be some impact on 1996 data from this category being second on the list rather than first.
 4. The count of 'Māori' ethnicity increased between 1991 and 1996 but there has been little change between 1996 and 2001. There may be some effect from the category being listed first in 1996 but second in the other years. Furthermore, additional categories may have increased multiple response, and there may be some effect from people answering on the basis of ancestry.
 5. There were more people who answered several categories in 1996 in comparison with 1991 and 2001. This has affected data comparisons for those who want to analyse single ethnicity response categories, including the sole Māori ethnic group.
2. Data for the 'Māori' ethnic group in the 1996 Census may not be consistent with that of 1991 or 2001.
 3. Data for the 'Asian' ethnic groups for the 1996 Census is less affected by the question changes.
 4. Data for the 'Pacific peoples' ethnic groups for the 1996 Census is less affected by the question changes.
 5. Data for single and combination ethnic groups for the 1996 Census is not consistent with that of 1991 or 2001.
 6. Data for prioritised ethnic groups for the 1996 Census is not consistent with that of 1991 or 2001.

Statistics New Zealand will not revise the 1996 Census data to impose consistency with the 1991 or 2001 ethnic data.

Population estimates

Population estimates for the period back to 1991 will be reviewed in light of the data from the 2001 Census. Part of this review will include the estimates of the Māori ethnic population and the different results provided by the three census counts. National and Māori population estimates will be provided in July 2002.

Further information

A technical paper with further details and analysis of the data is available at www.stats.govt.ethnicity.

General terms and definitions

General definitions can be found in *Definitions and Questionnaires*.

Cautions for users

As a result of these question and data changes, it is recommended that users note:

1. Data for the European ethnic groups in the 1996 Census is not consistent with that of 1991 or 2001. This includes data for the 'New Zealand European' subgroup, as well as other European subgroups such as 'Irish', 'Welsh', 'Dutch', and 'Italian'.
