

Licence Agreement

Classifications Coding System (CCS)

1. Interpretation

'Classification Coding System (CCS)' means computer software produced by Statistics NZ, and the classification codes and coding index entries incorporated in it

'Coding Index Entries' means the list of words and codes used in coding industry and geographic locations. (NB: Other coding index entries are incorporated into the CCS).

2. Permitted Uses

This Licence Agreement grants:

- (a) Use of the CCS in a stand-alone capacity or in a LAN network;
- (b) Production of hard copy and computer files from the CCS for use by the licensee only

3. Uses Not Permitted

This Licence Agreement does not grant:

- (a) Making copies of the CCS software;
- (b) Renting, leasing, sub-licensing, lending, selling, assigning or transferring the CCS to third parties;
- (c) Reproducing, distributing or commercialising the CCS, or any product or service derived from or incorporating it or part of it;
- (d) Release of geographic codes and descriptors from the CCS to third parties

4. Updates

Updates to the CCS either in terms of classification codes and index entries or in terms of software will be made available on the website.
