Total underutilisation June 2024 quarter, seasonally adjusted $^{(1)(2)(3)}$

Footnotes:

- 1. No seasonal pattern is evident for available potential jobseekers. Therefore, this series is not seasonally adjusted.
- 2. Due to rounding, changes do not always sum to the published totals.
- 3. All changes are quarterly.

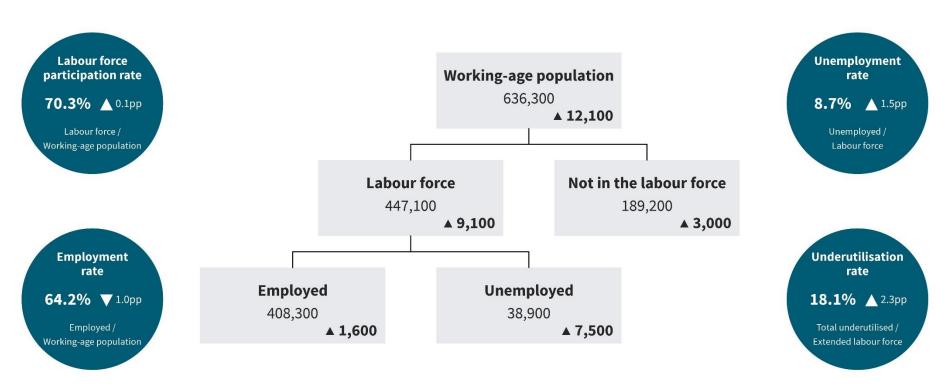

Labour market activity by disability status People aged 15 to 64 years, June 2024 quarter(1)

Footnote:

1. Due to rounding, differences do not always sum to the published totals.

Labour market summary – Māori June 2024 annual average $^{(1)(2)(3)}$

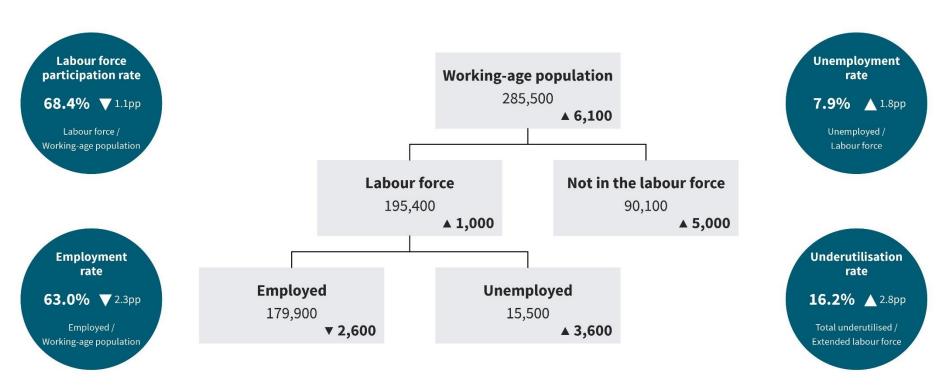

Footnotes:

- 1. Estimates are not seasonally adjusted, and therefore presented as annual averages ending with the current quarter. Changes are from the previous year's annual average.
- 2. Changes in Working-age population, Labour force, and Unemployed levels were statistically significant, as were changes in Unemployment and Underutilisation rates. Other changes are not statistically significant because they are less than the sampling error. Note that the change in the working-age population is always significant as one of our benchmarked measures.
- 3. Due to rounding, changes do not always sum to the published totals.

Labour market summary – Pacific peoples

June 2024 annual average (1)(2)(3)

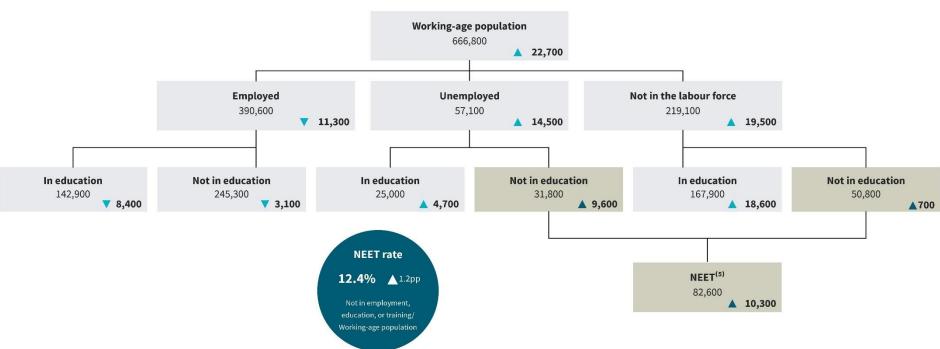

Footnotes:

- 1. Estimates are not seasonally adjusted, and therefore presented as annual averages ending with the current quarter. Changes are from the previous year's annual average.
- 2. Changes in Unemployment levels were statistically significant, as were changes in Unemployment, Employment and Underutilisation rates. Other changes are not statistically significant because they are less than the sampling error. Note that Pacific peoples' working-age population is not benchmarked.
- 3. Due to rounding, changes do not always sum to the published totals.

Labour force and education status of people aged 15 to 24 years

June 2024 annual average (1)(2)(3)(4)(5)

Footnotes:

- 1. Estimates are not seasonally adjusted, and therefore presented as annual averages ending with the current quarter. Changes are from the previous year's annual average.
- 2. Statistically significant changes were: Working-age population; Employed; Employed in education; Unemployed not in education; Not in the labour force; Not in the labour force in education; NEET levels, and NEET rate. The change in the working-age population will always be significant as one of our benchmarked measures.
- 3. Those who have not specified an education status are included in the totals only.
- 4. Due to rounding and exclusion of not specified groups, changes will not always sum to the published totals.
- 5. NEET refers to those people aged 15–24 years not in employment, education, or training.
